

Version 0.0.4 released

Important changes

I've made a big refactor on the project:

- hu.javaforum.android.androidsoap hu.javaforum.android.soap
- hu.javaforum.android.androidsoap.soap hu.javaforum.android.soap
- hu.javaforum.android.androidsoap.soap.impl hu.javaforum.android.soap.impl
- hu.javaforum.android.http.conn.ssl hu.javaforum.android.soap.ssl
- hu.javaforum.android.http.impl.client hu.javaforum.android.soap.ssl

New features

- BigDecimal and BigInteger support
- enum support
- WS-Security Header
- Trust all SSL flag
- Improved logging (slf4j-android)
- [Step by step tutorial](#)

Changelog

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Jira server returned an error: [Ljava.lang.Object;@81b1353
