[Why is it worth to know the business domain?](#)

[Ketler István](#) posted on Mar 07, 2013

A good developer succeeds even if his business domain knowledge is rather poor. However, as soon as he is going to be really useful engine, he might want to suggest solutions, then it is worth to learn all of the itsy-bitsy details of the domain, and he doesn't consider any small information chip to be „unnecessary”. The next fable was written with having this thought in mind. Once upon a time, there was a lead software architect. This said architect picked up the phone one day. 'Abraham Smith....
